NOTES TO THE PARENT COMPANY FINANCIAL STATEMENTS

The parent company financial statements for the year ended December 31, 2010 have been prepared in accordance with legal and regulatory requirements as currently applicable in France.

Audit procedures have been performed, and issuance of the audit opinion is pending.

1 Significant events

Acquisition of TMC and NT1

Since 2007, the TF1 Group had held a 33.5% interest in the AB Group, which in turn held investments including a 40% interest in TMC and a 100% interest in NT1. TF1 also held a 40% direct interest in TMC, acquired in 2005.

On June 11, 2010, TF1 and the AB Group finalized the implementation of the agreement signed on June 10, 2009, as a result of which TF1 acquired from the other AB Group shareholders their remaining 66.5% stake in the AB Group's 40% interest in TMC and the 100% interest in NT1 held by the AB Group, for a total price of €194.9 million.

TF1 has retained the same interest in the other activities of the AB Group (33.5%) as it held prior to this transaction; this interest is valued at €155 million. The AB Group management team has been granted a call option over this interest, exercisable at any time during a two-year period starting June 11, 2010 at a price of €155 million.

Acquisition of an equity interest in Wikio in exchange for the equity interest in JFG Networks

On November 11, 2010, the TF1 Group reached an agreement with the Wikio Group under which TF1 transferred its 40% equity interest in JFG Networks in exchange for shares in a new group comprising JFG Networks, Wikio and Wikio's other subsidiaries. Following this transaction, the TF1 Group became a shareholder in the Wikio Group with a 13.2% equity interest.

2 Accounting policies

The accounting policies described below have been applied in compliance with the principles of prudence, lawfulness and fairness in order to represent faithfully the company's assets, liabilities and financial position and the results of its operations, in accordance with the following fundamental concepts:

- going concern;
- consistency of method from one period to the next;
- accrual basis of accounting;

and in accordance with the general rules applicable to the preparation and presentation of annual individual company financial statements in France.

The basic method used for measuring items recorded in the books of account is the historical cost method.

2-1. Comparability of the financial statements

There were no changes in accounting policy during the year ended December 31, 2010.

2-2. Intangible assets

2-2-1. General principles

In order to secure programming schedules for future years, TF1 SA enters into binding contracts under which it acquires programme co-production shares and the other party agrees to deliver the programme in question.

Programme co-production shares are recognised as intangible assets on technical acceptance and opening of rights.

Payments made before the conditions for recognition are met are recognised in the balance sheet under "Advance payments".

Programmes acquired for a single transmission are fully amortised on transmission.

Where programmes are acquired for two or more transmissions, they are amortised as follows, according to the type of programme:

Type of programme	Dramas with a running time of at least 52 minutes	Cartoons	Other programmes
- 1st transmission	80%	50%	100%
- 2nd transmission	20%	50%	

"Other programmes" in the table above refers to children's programmes (other than cartoons), entertainment shows, plays, factual and documentary programmes, news, and dramas with a running time of less than 52 minutes.

A provision for impairment is recorded once it becomes probable that a programme with a co-production share will not be transmitted. Probability of transmission is assessed on the basis of the most recent programming schedules approved by management.

2-2-2. Co-productions available for transmission

Co-production shares in programmes not yet broadcast on the TF1 channel are recorded on this line at acquisition cost.

2-2-3. Co-productions available for retransmission

Co-production shares in programmes broadcast once but still available for one or more repeat broadcasts are recorded on this line, and are valued at 50% or 20% of acquisition cost depending on the type of programme (drama, cartoons, other), or at their contractual value.

2-2-4. Co-productions in progress

This line is used to record screenplays and other texts that have not yet gone into production. The amount reported represents the sums actually paid as at the balance sheet date. Future contractual payments are disclosed as off balance sheet commitments.

2-2-5. Other intangible assets

Other intangible assets are measured at acquisition cost (or production cost), net of accumulated amortisation and impairment.

2-3. Property, plant and equipment

Property, plant and equipment is measured at acquisition cost, net of accumulated depreciation and impairment.

Depreciation periods and methods are summarised below:

Technical facilities	Straight line	3 to 7 years
Other property, plant and equipment	Straight line	2 to 10 years

2-4. Non-current financial assets

Equity investments are measured at acquisition cost, comprising the purchase price and transaction costs. Annual impairment tests are performed on the basis of revenue and profit projections derived from business plans, using the discounted cash flow (DCF) method. If the value in use of an investment falls below acquisition cost, a provision for impairment is recorded. If necessary, this provision may be supplemented by a provision for impairment of the current account with the subsidiary or affiliate and a provision for liabilities and charges.

2-5. Inventories and work in progress

2-5-1. General principles

In order to secure programming schedules for future years, TF1 SA enters into binding contracts (in addition to co-production share acquisition contracts) under which it acquires (and the other party agrees to deliver) programme rights and sports transmission rights.

A programme is recognised in inventory once technical acceptance and opening of rights have occurred.

Rights payments made before these conditions are met are recognised in the balance sheet under "Advance payments". Programmes acquired for a single transmission are regarded as having been consumed in full on transmission. Where programmes are acquired for two or more transmissions, consumption is calculated as follows:

- Programmes not individually valued in the contract:

Type of programme	Dramas with a running time of at least 52 minutes	Films, TV movies, serials and cartoons	Other programmes
- 1st transmission	80%	50%	100%
- 2nd transmission	20%	50%	

- Programmes individually valued in the contract: consumption reflects the contract price.

“Other programmes” in the table above refers to children’s programmes (other than cartoons), entertainment shows, plays, factual and documentary programmes, news, and dramas with a running time of less than 52 minutes.

A provision for impairment is recognised:

- once it becomes probable that a programme will not be transmitted (probability of transmission is assessed on the basis of the most recent programming schedules approved by management);
- if the contractual value of the retransmission rights exceeds the value that would be attributed to those rights using the rules that apply to programmes that are not individually valued in a contract;
- where it is probable that a programme will be resold, and its carrying value in inventory exceeds the actual or estimated selling price.

Rights acquisition contracts not recognised in inventory at the balance sheet date are priced at the contractual amount (or the estimated future cash outflow in the case of output deal contracts) less any advance payments made in respect of the contract, which are recognised as an asset in the balance sheet in “Advance payments”

2-5-2. Broadcasting rights (initial transmission)

Rights that are open but which relate to programmes not yet transmitted on the TF1 channel are recorded on this line at acquisition cost or overall production cost (direct costs plus a portion of indirect production costs, excluding borrowing costs recognised as an expense).

2-5-3. Broadcasting rights (available for retransmission)

Rights relating to programmes available for one or more repeat broadcasts are recorded on this line, and are valued at 50% or 20% of acquisition cost depending on the type of programme (drama, cartoons, other), or at their contractual value.

2-6. Advance payments

Advance payments in respect of programme purchases are accounted for as described in note 2-5-1, and may be written down if impaired.

Payments made to purchase sports transmission rights are recognised in “Advance payments” until the sporting event takes place. If the rights are resold, a provision is recorded once the sale is probable, to cover any excess of the amount of advance payments over the actual or estimated selling price.

2-7. Trade debtors

Trade debts that are the subject of ongoing legal recovery proceedings are provided for in full (excluding VAT).

Provisions for risks of non-recovery of trade debts more than 2 years past due are also recorded, on the following basis:

- 100% of all trade debts (excluding VAT) arising before January 1, 2008 and still unpaid;
- 50% of all trade debts (excluding VAT) arising during 2008 and still unpaid.

Risks on trade debts arising since December 31, 2008 and still unpaid at December 31, 2010 are immaterial.

2-8. Short-term investments and cash

TF1 SA provides centralised treasury management for the Group. Treasury current accounts are classified as cash in order to achieve consistency with the classification of treasury current account credit balances, included in "Other borrowings".

Short-term investments are measured at acquisition cost. A provision for impairment is recorded if the recoverable amount falls below acquisition cost.

2-9. Foreign-currency transactions and unrealised foreign exchange gains/losses

Invoices received in foreign currencies are translated into euros at the rate prevailing on the date of initial recognition, and foreign-currency liabilities are translated using the exchange rate prevailing as of December 31. Unrealised foreign exchange losses and gains are recorded on the relevant lines on the assets and liabilities sides of the balance sheet.

Unrealised foreign exchange losses on unhedged liabilities are covered by a provision included in "Provisions for liabilities and charges".

2-10. Restricted provisions

This item comprises:

- tax depreciation on co-production shares for programmes not yet transmitted, calculated from the first day of the month following the end of shooting in accordance with the rules defined by the French tax authorities on July 3, 1970. The monthly percentages used are:

- Month 1	20%
- Month 2	15%
- Months 3 to 9	5%
- Months 10 to 24	2%

- tax depreciation of software and licences, in addition to the accounting depreciation recognised in the balance sheet;

- tax depreciation on transaction costs on acquisitions of equity interests, calculated over 5 years on a straight line basis.

2-11. Provisions for liabilities and charges

A provision is recorded when a legal or constructive obligation to a third party arising from a past event will certainly or probably result in an outflow of resources that can be measured reliably. Provisions are reviewed at each balance sheet date, and adjusted where necessary to reflect the best estimate of the obligation as of that date.

Contingent liabilities are obligations whose existence will be confirmed only by the occurrence of future events or for which the outflow of resources cannot be measured reliably. No provision is recorded for contingent liabilities.

2-11-1. Retirement benefits

TF1 SA's obligation in respect of retirement benefits is limited to the level of benefits stipulated in the relevant collective agreements. It is calculated using the projected unit credit method at the expected retirement date based on final salary, and recognised as a liability in "Provisions for liabilities and charges", net of amounts transferred to an insurance fund.

2-11-2. Long-service leave

Additional compensated absence is awarded by TF1 SA to employees based on length of service. The calculation of the cost of vested compensated absence rights takes into account length of service, salary at the time the rights will be taken up, and staff turnover. The resulting liability is discounted, and is recognised in "Provisions for liabilities and charges".

2-11-3. Other provisions for liabilities and charges

These mainly comprise provisions for litigation and claims. The provision is measured as the probable outflow of resources resulting from ongoing litigation or claims arising from an event prior to the balance sheet date. They include provisions for tax and social security disputes. The amount shown on reassessment notices issued by the authorities is provided for unless the company regards it as highly probable that it will successfully defend its position against the authorities. The undisputed portion of reassessment notices is recognised as a liability as soon as the amount is known.

2-12. Advertising revenue

Sales of advertising airtime are recognised as revenue on transmission of the advertisement or commercial. The revenue recognised is the amount invoiced by TF1 Publicité to the advertiser for the airtime, less the agency commission earned by TF1 Publicité.

TF1 makes marginal use of barter transactions involving advertising with media other than television, such as radio or print media. These transactions are reported on a non-netted basis, with matching amounts recognised as income in "Revenue" and as expenses in "External expenses".

2-13. Off balance sheet commitments

Image transmission commitments represent fees payable to the transmission service operator until the expiry date of the contract.

Caution money and guarantees paid under commercial contracts are disclosed as off balance sheet commitments.

2-14. Financial instruments

TF1 uses financial instruments to hedge its exposure to fluctuations in interest rates and exchange rates. This exposure is generated by transactions entered into by TF1 SA itself, and by foreign exchange guarantees provided to subsidiaries in connection with the centralised management of the Group's foreign exchange risk.

Group policy is to trade on the financial markets solely for hedging purposes related to its business activities, and not to trade for speculative purposes.

Gains and losses on financial instruments used for hedging purposes are measured and recognised symmetrically with the recognition of gains and losses on the hedged item.

4-9. Income taxes

This item breaks down as follows:

(€m)	2010	2009

Income tax credits receivable from companies entitled to tax credits	21.9	20.5
Income taxes	(33.5)	17.7

Income tax credits arising on exceptional items amounted to €3.3 million.

TF1 made a group tax election on January 1, 1989. Under the group tax election agreement, the tax liability borne by each company included in the election is the same as it would have borne had there been no group tax election. The group tax election included 37 companies in 2010.

The difference between the standard French tax rate of 34.43% and the effective tax rate of 17.6% is mainly due to tax-exempt income in 2010 (primarily dividends) and tax savings arising from the losses of group tax election member companies.

The total amount of tax losses that generated savings for the tax group and may generate a tax liability in the future is €121.7 million.

4-10. Deferred tax position

The table below shows future tax effects that were not recognised by TF1 SA at the balance sheet date but will be recognised when the underlying transactions are recognised in the income statement. They were calculated using a tax rate of 34.43%.

TF1 SA had not contracted any complex commitments as of December 31, 2010.

5-2. Use of hedging instruments

5-2-1. Hedging of foreign exchange risk

TF1 is exposed to fluctuations in exchange rates as a result of:

- making and receiving commercial payments in foreign currencies;
- providing subsidiaries with a guaranteed annual exchange rate per currency, applied to annual projections of their foreign-currency cash needs or surpluses.

TF1 buys and sells currency forward and contracts swaps to protect itself against exchange rate fluctuations. These hedging instruments, which are traded on the currency markets, cover 100% of the Group's net exposure for 2011 and 2012 arising from contracts already signed as at December 31, 2010.

At December 31, 2010, the equivalent value of these hedging instruments contracted with banks was €148.0 million, comprising:

- €131.7 million of forward purchases (€3.5 million in GBP, €128.2 million in U.S. dollars);
- €16.3 million of currency swaps (all in U.S. dollars).

5-2-2. Hedging of interest rate risk

In pursuance of the TF1 Group's interest rate risk management policy (as described in the TF1 consolidated financial statements for the year ended December 31, 2010), TF1 SA has contracted the following instruments:

- two €50 million interest rate swaps, both contracted in 2010 and expiring in 2011;
- two €100 million interest rate swaps, one contracted in 2008 and one in 2009, which both expired in February 2010;
- a €300 million interest rate swap, contracted in 2003, which was closed out in January 2010.

The portion of the total obligation in respect of retirement and other post-employment benefits relating to these key executives was €2.6 million.

The Bouygues Group offers the members of its Executive Committee, who include Nonce Paolini, a top-up pension of 0.92% of the reference salary for each year of service in the scheme, which represents a post-employment benefit. The expense (invoiced to TF1 by Bouygues) relating to the contribution paid in 2010 to the investment fund of the insurance company which manages the scheme was €0.1 million.

Apart from loans of shares made to key executives who are also members of the Board of Directors in connection with their duties, no material loans or guarantees were extended to key executives or members of the Board of Directors.
